About

Artur is a versatile engineer, team lead and product designer, with over 10 years of experience building sleek, high-performance websites, applications, and open-source libraries. His background spans public speaking, community engagement, developer relations and project management. Offline, he enjoys playing analog RPGs, brewing pour-over coffee, recording podcasts, and steering canal boats.

Skills

- > **Frontend:** HTML, CSS, JavaScript/TypeScript, React, Preact, htmx, Svelte
- > **Backend:** Node.js, Express, Deno, Django, Rails, PHP, Docker, CI/CD, Nginx, Caddy
- > **Hardware:** Arduino, ESP-8266/32, 12v DC and solar electrics, intermediate soldering skills
- > **Technical Leadership:** Team and project leadership, product design, roadmap planning, hiring, cross-functional collaboration, marketing, open-source
- > **Developer Relations:** Conference & meetup speaking, mentoring, community management, authoring technical documentation

Experience

Transloadit (2016–2024) – Project & Team Lead, Senior UI Developer

uppy.io | github.com/transloadit/uppy | transloadit.com

Led Uppy.io from an idea to **30K GitHub stars** and **1M monthly npm downloads**, making it one of the top open-source file uploaders, used by **Coursera**, **Photobox**, **Issuu**, and others.

- > Designed and built the UI and **modular plugin architecture** with accessibility and DX in mind. Conducted regular **accessibility audits** to ensure features were accessible via keyboard and screen readers.
- > Developed a range of plugins to extend uploader and file picker functionality, including webcam support, voice notes, Instagram integration, import from URL, file compression, and more. Applied creative problem-solving™, such as leveraging IndexedDB and Service Workers to **persist selected files and metadata** – ensuring users wouldn't lose progress if they navigated away, closed the tab, or restarted the browser.
- > Played a key role in recruiting and **leading a high-performing team** of developers and designers. **Defined product direction** with realistic goals, planned and prioritized roadmaps for releases from beta 0.x to 4.0 major. Fostered effective collaboration by organizing 1:1s, aligning tasks with each team member's strengths, and ensuring clear communication across the team.
- > Organized team-building **Worms Armageddon** tournaments 🐉 and various company offline events in Europe.
- > Developer relations: represented Uppy and Transloadit at **various conferences and meetups**, such as Brooklyn.js, Manhattan.js, Nation JS, and Node PDX, and others.
- > Handled commercial support, providing direct assistance to business customers via Slack and Zoom. Collaborated closely on priority features, ensuring timely delivery, aligned with business customer needs.
- > Managed community engagement: resolved GitHub issues, triaged bugs and feature requests, wrote engaging release blog posts (**featured on HN/Product Hunt**), and scaled user support.
- > Contributed to improvements in the admin interface (React) and backend (PHP), and optimized JavaScript

bundle size to enhance load times and overall performance.

Baguette Studio (2012–2017) – Full Stack Engineer and Project Lead

unebaguette.com

Bootstrapped a studio delivering **lightweight, performant and accessible** websites, apps, and online stores. Collaborated with top designers and developers.

- > Led development for clients in culture, fashion, education, and local business sectors – including the Polytechnic Museum, Nycomed, Kidzania, Let's Bike It! (urban cycling advocacy), Arsenicum (fashion), Brownfox (type design), Serebro Nabora (type conference), and Local Food Market.
- > Built frontends and full-stack solutions using technologies such as React, jQuery, Django, WordPress, and Shopify, tailoring tech choices to each project's needs.
- > Managed **client communication and project timelines** across multiple concurrent projects, ensuring high quality and on-time launches.

Polytechnic Museum (2012–2013) – Frontend Developer

Collaborated closely with a designer and backend developer to completely rebuild the frontend of the Polytechnic Museum website from scratch. The project covered a wide range of sections, including the news feed, blog, interactive historical timelines, photo galleries, and authenticated user areas. Focused on creating a modern and maintainable UI that brought the museum's digital presence up to date.

LiveJournal.com (2008–2012) – Senior Technical Support

Handled support at LiveJournal – the most popular blogging platform and social media website among Russian-speakers at the time. Triaged user-reported bugs, collaborated with iOS engineers on WebView components for the LiveJournal mobile app, and improved platform stability.

Neonika (2006–2007) – Web Designer

Designed and implemented user interfaces for the LiveAlbums social network, focusing on clean, intuitive layouts and smooth user interactions. Contributed to branding and visual style, helping shape the platform's overall look and feel.

Public Speaking

Conferences & Talks

- > Uppy: Building a File Uploader That Won't Bark at the Mailman
Manhattan.js (New York, USA, 2018)
- > Building a Robot That Talks To You
Brooklyn.js (New York, USA, 2016)
- > Divide & Conquer Your House
Queens.js (New York, USA, 2016)
- > The House Is Not On Fire
NodePDX (Portland, USA, 2016)
- > Tent, Lettuccia & Uppy.io
IndieWebCamp Baltimore (Baltimore, USA, 2018)
- > The House Is Not On Fire
NationJS (Washington DC, USA, 2016)

Workshops & Events

- > Mentor at Global Diversity Day
New York City, USA (2018)
- > Web Development for Beginners Crash Course
Moscow, Russia (2015)
- > Apple WWDC Live Commentary
Strelka Institute for Media, Architecture and Design (Moscow, Russia, 2012)

Podcasts

- > I co-hosted and produced **Immigrantcast**, a popular podcast (**5K listens per episode**) discussing life in different countries, retro-tech, DOS games, mechanical keyboards, boats, and film photography. I built a static website with dark mode, timecode support in the audio player, and a 99 Lighthouse score.
